

Death Benefits - For deaths occurring November 1, 1993 through December 31, 1994

Weekly death benefits for beneficiaries are computed as percentages of the deceased's average weekly wage, which shall be taken as not more than the State's Average Weekly Wage. The maximum weekly income benefits payable to all beneficiaries shall not exceed the weekly amount the deceased would have received for permanent total disability (PTD). The PTD rate is computed at 70% of the deceased's average weekly wage, up to a maximum of \$307, which is 75% of the State's Average Weekly Wage of \$409.

The following chart is an **EXAMPLE**. It represents the weekly income benefits payable to beneficiaries using the maximum permanent total disability (PTD) rate of \$307.

	Spouse only: Surviving spouse 50% x \$409 =	\$204.50
	Spouse and one (1) child:	
	Surviving spouse: 50% x \$409 =	\$204.50
	Child: 15% x \$409 = <u>\$61.35</u>
		\$265.85
3.	Spouse and two (2) or more children:	
	Surviving spouse: 50% x \$409 =	\$204.50
	Children: \$307 - \$204.50 = Total allowable benefits for children	<u>\$102.50</u>
		\$307.00
	(\$102.50 ÷ number of children = Benefits per child)	
4.	No spouse, one (1) child: 35% x \$409 =	\$143.15
5.	No spouse, two (2) children: 50% x \$409 =	\$204.50
	(\$204.50 ÷ 2 = \$102.25 per child)	
6.	No spouse, three (3) children: 65% x \$409 = \$265.85
	(\$265.85 ÷ 3 = \$88.62 each for two children and \$88.61 for one child)	
7.	No spouse, four (4) or more children:	
	80% x \$409 = \$327.20 which exceeds \$307, so total allowable benefits	
	for children equals the maximum permanent total disability rate	\$307.00
	(\$307.00 ÷ number of children = Benefits per child)	
8.	Mother or Father only dependent: 25% x \$409 =	\$102.25
9.	Mother <u>and</u> Father dependent: 50% x \$409 =	... \$204.50
	(\$204.50 ÷ 2 = \$102.25 per parent)	
10.	Brothers, sisters, grandparents and grandchildren, if dependent: 25% of the deceased worker's average weekly wage (if more than one dependent, divided equally, subject to the maximum of \$307).
